MyERAS 2011
Allopathic Applicants

For use by US medical schools and applicants only, in their preparation for ERAS 2011.
© AAMC 2010
Login/Home Page

The MyERAS home page is accessible at: http://services.aamc.org/eras/myeras.
Registration
Register – Step 1

In Step 1, the applicant provides general information including name, date of birth and medical school of graduation information.
In Step 2, the applicant is asked to confirm the information provided in Step 1.
Register – Step 3

In Step 3, the applicant receives an AAMC ID assignment and registration is complete.

You have successfully registered with MyERAS!

Please note your AAMC ID, you will need it to login to MyERAS as well as the ADTS. Click "Continue" to begin working on your MyERAS application.

It is recommended that you print out this page for your records.

AAMC ID: 12302572
Name: Kooli Agathon

continue
MyERAS Home Page

Each time an applicant logs in, they will arrive at the Home Page. They should check here for alerts and notification of e-mail messages in the Message Center.
MyERAS Profile
The Profile provides information that applicants may update at any time during the application process, even after the application has been certified and released to ERAS.
MyERAS Profile - Part 2

Updateable information

USMLE ID: 88888888 (Required for USMLE Transcript transmission)
NBOME ID:   (Required for COMLEX Transcripts transmission)

Match Information:
   AUA Number  (Required for Urology Match Participants Only)

☑ I plan to participate in the NRMP Match.
☐ I am applying as part of a couple AND wish to notify programs of this
   Partner’s Name: 
   Specialties Partner is applying to: 

Information about the NRMP Match

☐ I am ACLS (Advanced Cardiac Life Support) certified in the USA.  Exp. Date:  MM / DD / YYYY
☐ I am PALS (Pediatric Advanced Life Support) certified in the USA.  Exp. Date:  MM / DD / YYYY

The MyERAS Application
The Home tab shows the status of the application at a glance and displays the two versions of the MyERAS application.
The General tab collects the applicant’s general biographical information, permanent address, and military information.
Application - Education Tab

On the Education tab, applicants record undergraduate and graduate education.
Application – Medical Education Tab

On the Medical Education tab, applicants record medical school education.
On the Training tab, applicants record residency and fellowship experience.
On the Experience tab, applicants record work, volunteer and research experience.
On the Publications tab, applicants record published works. ERAS does not verify these entries.
On the Exams tab, applicants self-report all board exams taken and the status of the exam (passed, failed, awaiting results). Official exam results are transmitted from NBME, NBOME, or ECFMG (for IMGs) when requested by the applicant.
Information pertaining to the applicant’s medical licensure is collected on the Licensure Information tab.
Application – Board Certification

**Description**

1. Is the ONLY circular sawing tool featuring orbit action, perfect for aggressive wood cutting, or simply switch it into straight jogging action for cutting metal and plastics.
2. Exclusive removable battery pack, together with a battery adjustable shoe and 3/4 in. stroke length, makes the finisher the ultimate tool for remodeling, general construction and demolition work.
3. Steel Quick-Lock blade clamp accepts universal 1/2 in. shank size blades, or without the need of a hex key. Blade clamp will accept blades up to 5/8 in. in. stroke length, which is ideal for all Milwaukee 707 Power Plus tools.
4. The universal one-piece blade can be used to change any Milwaukee Power Plus safety.
5. 3/4 in. stroke, 1200 SPM. Adjustable shoe, adjustable handle, orbital action and counter balance design.

**Reason for Leaving**

Is not quite sure, but it was time to move on.
In Part 1 of the application certification process, applicants must click “Next” to verify that they understand they cannot change their MyERAS application after submitting it.
Part 2: AAMC Policies

Note on AAMC Policies Regarding The Collection, Use, and Dissemination of ERAS Application Data: The AAMC recognizes its responsibility to treat with care the information it collects about individuals involved in medical education, and to respect their privacy relative to sensitive data concerning them. To meet this obligation, the Association has developed policies (PDF file) to prevent the exposure of truly confidential personal data without the permission of the individual involved; to limit the distribution of sensitive data to those situations which require it; and to permit distribution of non-sensitive, directory information wherever a useful purpose can be served.

To ensure honesty and integrity in the application process, applicants must establish a process for investigating all allegations pertaining to the submission of fraudulent information and documents to the ERAS system. Review the AAMC Policies Regarding the Collection, Dissemination of Resident, Intern, Fellow, and Residency, Intern, Fellowship Application Data (attached policy, PDF) and ensure to certifying and submitting your request.

In Part 2 of the application certification process, applicants must click “Next” to confirm they understand the AAMC’s Privacy and Data policy and ERAS’ Integrity Promotion Policy.
In Part 3 of the application certification process, applicants must certify the information provided is accurate prior to submitting to ERAS.
The certification statement also discusses ERAS’ Integrity Promotion Policy.
Application Submit – Part 4

Applicants must certify the application and officially release the information to parties they designate to receive it.
Application Confirmation

Application Submission Results

Your ERAS Application is being transmitted to the ERAS PostOffice.

Please now select and apply to your desired programs, and ensure all your supporting documents are assigned correctly to those programs.

Continue

Confirms the applicant’s MyERAS application has been sent to the ERAS PostOffice and that the applicant may begin applying to programs.

Description:

1. The CPM is capable of embedding 30 to 100 cases of surgical action, affixed for aggressive non-coding, or simply uncodified into support and management homes for coding and setting.

2. The 65 mm radiography battery pack, together with a branchable adjustable head and 150 m. section length, makes the P-65 the ultimate tool for recording general information and anesthesiology.

3. The Quick-Safe blade clamp accepts 102 x 2. Set without the need of a box bay. Blade clamp will accept blades of standard sizes for cross-gather cutting.

4. A deep vein stent delivers more into time and is compatible/interchangeable with all other Milwaukee Stent Pneumatic Battery Assy. The internal use for stent charger via the lead charge can be used to charge any Milwaukee Pneumatic Battery Assy. 69, 9, 99. Adjustable, variable, adjustable handle, GOV 3000, and supervisor-activated.

How do I...?
- How do I designate a Letter writer?
- When will programs get my documents?
USMLE Transcript

What you need to know about USMLE Transcripts...

The authorization and distribution of your USMLE transcript is a four-step process:
1. Verify that the correct USMLE is in the profile.
2. Authorize the release of your transcript.
3. Decide whether you want to have it resent automatically when a new score becomes available.
4. Assign your transcript to your programs. (Under the Programs tab)
Carefully read the questions and instructions below. Once ERAS processes your request, your selection CANNOT be changed.

Yes

Do you authorize the transmission of your USMLE transcript, by the NBME, which includes a complete Step history and, if applicable, the release of your NBME passing Part scores?

Select yes to automatically transmit your licensing examination results, as stated above, to the residency programs you designate in Programs. (FLEX scores are not available through ERAS). Later you will need to assign the USMLE transcript to each program that you want to receive your results. If you do not assign the transcript to a program, the program will not receive your results. (See Programs).

Your USMLE transcript will include your complete results history of all Steps and Step Components that you took and your history of any examinations for which no results were reported.

If you have not taken any USMLE Steps at the time you submit your transcript request via ERAS, or you have taken your first Step exam but your result has not yet been reported, your transcript request will be held until such time your first result becomes available. If you answer yes to this question, your result will be sent to all programs you selected as soon as it becomes available, even if you choose "no" for automatic retransmission (see below).

Attention US Students/Graduates: It is recommended that you include your US Social Security Number (SSN) in the Profile section of your ERAS application. A missing SSN impacts NBME's ability to verify your identify, and thus could significantly delay USMLE transcript processing.

Note: Inadvertent delays caused by operational problems at your medical school, the ERAS Post Office or the NBME, while unlikely, could delay the processing of your transcript beyond an upcoming score release date.

ATTENTION

- Be very careful when answering the question below - it CANNOT be changed.
- By checking yes, you forfeit the right to see any newly included examination results before the transcript is sent to the residency program.
- If unsure, check no. If, after you have seen your new examination results, you want it transmitted after all, you can do it yourself. You will need to go to Documents and click on "Retransmit USMLE Transcript".
- Updated examination results cannot be transmitted to only a subset of programs. If you request an updated USMLE transcript be retransmitted, it will be sent to every program that previously received it.
- Please be aware that only you can re-transmit your transcript. Nobody can do that for you.

Yes

Do you authorize the automatic retransmission of your USMLE transcript if Step results, which were not available at the time your request was processed, become available during the current ERAS cycle?

Select yes to automatically transmit previously unreleased USMLE Step results, as they become available to programs you designated in Programs. This option is IRREVOCABLE, affects ALL programs to which you assign USMLE transcripts, and transmission may occur BEFORE you receive notification of the results of the examination.
You cannot request a COMLEX transcript until you have entered an NBOME ID in the profile.

What you need to know about COMLEX Transcripts:

COMLEX is an exam administered by the National Board of Osteopathic Medical Examiners (NBOME). Normally, only students and graduates of US osteopathic medical schools, who have a D.O. degree rather than an M.D., take the COMLEX exam.

Important:
- To process your transcript, your first name, last name, SSN, and COMLEX ID in the MyERAS Profile must match what the NBOME has on record for you.
- Please log in to the NBOME Online Registration and Information System web site to verify that the information there is 1) correct and 2) matches the data in your MyERAS Profile.
- If you are not sure if you have taken the COMLEX exam, you should not request a COMLEX transcript.
Carefully read the questions and instructions below. Once ERAS processes your request, your selection CANNOT be changed.

**Yes**

Do you authorize the transmission of your COMLEX transcript, by NBOME, which includes a complete history of your scores at the time your request is processed?

Select yes to automatically transmit your licensing examination scores, as stated above, to the residency programs you designate in Programs. Later you will need to assign the COMLEX transcript document to each program that you want to receive your scores. If you do not assign the transcript to a program, the program will not receive your scores. (See Programs). Your transcript will include the scores available ON THE DATE YOUR REQUEST IS PROCESSED BY NBOME.
Personal Statements

Create a Personal Statement

VIEW PS 1 - PS 1  [print ps] [assignments]
Applicants can cut and paste text into the Personal Statements content section.
Instructions:
Below is your Personal Statement, as it has been saved. Please review it at this time carefully.
If any special characters or formatting were pasted into the Personal Statement, it may appear oddly to the programs.

What you will see below is how it is saved, special characters are saved as a question mark (?). All question marks have been highlighted for review - if you see any question marks that should not be there, click edit below and clean up the document.

Programs view their Personal Statements with standard font of Courier New 10pt, as is displayed below.

Statement:

McLaren F1 (missing headlight covers)Chief engineer Gordon Murray's design concept was a common one among designers of high-performance cars: low weight and high power. This was achieved through use of high-tech and expensive materials like carbon fiber, titanium, gold and magnesium. The F1 was one of the first production cars to use a carbon-fiber monocoque chassis.

The idea was first conceived when Murray was working for a flight home back from the fateful Italian Grand Prix in 1986. Murray drew a sketch of a three seater supercar and proposed it to Ron Dennis. Later, a pair of Ultima MK3 kit cars, chassis numbers 12 and 13, "Albert" and "Edward", the last two MK3s, were used as "mules" to test various components and concepts before the first cars were built. Number 12 was used to test the gearbox with a 7.4 litre Chevrolet V8 to mimic the torque of the BMW V12, plus various other components like the seats and the brakes. Number 13 was the test of the V12, plus exhaust and cooling system. When McLaren was done with the cars they destroyed both of them to keep away the specialist magazines and because they did not want the car to be associated with "kit cars".

The car was first unveiled at a launch show, 20th May 1992, at The Sporting Club in Monaco, the original prototype (XP1) remained the same as the production version except the wing mirror which was mounted at the top sill of the door which was deemed not road legal as there were no indicators at the front. McLaren was forced to make changes on the car as a result (some cars, including Ralph Lauren's were sent back to McLaren and fitted with the prototype mirrors). The original wing mirrors also incorporated a pair of indicators which car manufacturers as well as an aftermarket company would adapt several years later. The car's safety levels were first proved when during a testing in Namibia in April 1993, a test driver wearing just shorts and T-shirt hit a rock and rolled the first prototype car several times. The driver managed to escape unscathed. Later in the year, the second prototype (XP2) was especially built for crash testing and passed with the front wheel arch untouched.

[edit] Engine
They insisted that the engine for this car be normally-aspirated to increase reliability and driver control. Turbochargers and superchargers increase power but they increase complexity and can decrease reliability as well as the ability of the driver to maintain control.
Letters of Recommendation (LoRs)

Applicants can reserve a slot for LoRs before applying to programs. Applicants provide information about their LoR writers here.
IMGs applying to positions in California can use this feature to send their California Letter to designated programs.

* this information is visible ONLY to your designated dean’s office.
