Yankee Doodle Doctor

Next week, we will celebrate America’s Independence Day on the 4th of July. All of us have been learning since childhood about our early American heroes, such as John Hancock, Benjamin Franklin, and George Washington, but what do you know about John Morgan, colonial physician?

John Morgan, M.D., (1735-1789) is known as the founder of American medical education. Born and raised in Philadelphia, Penn., Dr. Morgan began his formal education at the College of Philadelphia, which later became the University of Pennsylvania. It was here that he first began to study medicine under a local physician, Dr. John Redman, while also working at Pennsylvania Hospital.

Following his college graduation, Morgan joined the military and spent the following four years as a field surgeon during the French and Indian War (also known as the Seven Years’ War). Once the war came to an end, Morgan traveled to Edinburgh to attend medical school. Upon earning his M.D., he traveled extensively throughout Europe, gaining respect along the way and eventually was elected to both the Royal Academy of Surgery at Paris and the Royal College of Physicians at Edinburgh and London.

Upon his return to Philadelphia, Morgan began collaborating with colleague Dr. William Shippen, Jr., and they pioneered medical teaching by developing the first medical school in the American colonies. The medical school was established at his alma mater, College of Philadelphia, and Dr. Morgan was given the first medical professorship in the country.

During the American Revolution, Continental Congress appointed Dr. Morgan director-general of the Army’s hospital in Boston. This was a daunting task indeed, given the supply shortages, disease (including a smallpox outbreak), and the lack of support by military personnel. Dr. Morgan was eventually replaced by his former partner, Dr. Shippen (with whom a rivalry had developed).

Dr. Morgan returned to Philadelphia tired and in poor health. He retired and spent the remainder of his life there, but kept busy working with many community organizations. He was a founding member of the American Philosophical Society, a member of the Medical staff of the Pennsylvania Hospital, one of the original fellows of the Philadelphia College of Physicians, and also a member of the Philadelphia Society for Promoting the Culture of Silk.

Dr. Morgan died on October 15, 1789, at the age of 53.
E-Learning Modules available to employees

KUMC has several e-learning modules for employees. Topics include:

- Career Advancement: Success for the Promotion Seeker
- Management/Leadership: Hiring Competent Employees, What Every Supervisor Should Know, and Writing Effective Position Descriptions
- Policies & Procedures: Corrective Action, Family & Medical Leave Act, FLSA, Overtime/Compensatory Time, Shared Leave, and Workplace Violence
- Professional Development: Managing Your Time, Preventing Harassment in the Workplace, and Conflict Management

To complete these trainings, click here. You will need to use your network username and password to log in.

You Scream, I Scream!

We all scream for ice cream! Join us for one of our favorite employee recognition events! The Frosty Treats ice cream truck will be on campus tomorrow, June 28, from 3 to 3:30 p.m. serving up cool, sweet treats for everyone. The truck will park at the main entrance in the 15-minute loading zone. For more information, contact Jera Teselle, HR, at jteselle@kumc.edu or 3-2615.

KU Pride

The next KU Pride will take place on Tuesday, July 3, at 9 a.m. in the Sunflower Room. Don’t miss it!

Funding opportunity for junior investigators

The Agency for Healthcare Research and Quality is accepting grant applications for its Patient-Centered Outcomes Research Pathway to Independence Award (K99/R00) program.

Approximately $1.5 million will be available to support the K99 phase of the award and $3 million for the R00 phase.

Important dates:
Opening date: July 2
Letters of Intent due July 6
Applications due July 31

Visit http://grants.nih.gov/grants/guide/rfa-files/RFA-HS-12-007.html for more information and to apply.

4th Fact

Malia Obama, George Steinbrenner, Neil Simon, Ron Kovic, and Calvin Coolidge were all born on the Fourth of July. The 1989 Oliver Stone movie starring Tom Cruise was based on the autobiography of Kovic.
KUSM-W in the News

- June 15—The Best Doctors List
- June 13—KU plans to ask state for $30 million to build $75 million medical education building
- June 12—Faust joins BCBSND as medical director

For the latest news about KUSM–W, click here.

Changes to the annual Human Subjects Protection Training

Effective July 1, 2012, KUMC will be eliminating the annual human subjects training requirement and instituting human subjects protection training on a three-year cycle. Any individual who has completed human subjects training after July 1, 2011, will be considered current until July 1, 2014. Please note, the Conflict of Interest Disclosure form must still be completed annually (after July 1) as required by the Kansas Board of Regents. For more information regarding research training requirements, please contact Jason Rush, jrush@kumc.edu.

Kansas Journal of Medicine

In this latest edition of the Kansas Journal of Medicine, you’ll find details about:

- The Female Athlete Triad: An Assessment of Current Practices in Primary Care and Benefit of Educational Intervention
- Predicting the Importance of Hospital Chaplain Care in a Trauma Population
- Fatigue and TSH Levels in Hypothyroid Patients
- hCG Induced Hyperthyroidism Due to a Metastatic Germ Cell Tumor
- Bilateral Adrenal Hemorrhage after Blunt Abdominal Trauma
- West Nile Encephalitis
- Endoscopy Ultrasound Imaging of an Abdominal Aortic Aneurysm
- Evaluation of a Submucosal Gastric Lesion
- Kansas Horse & Buggy Doctor Receives a Letter from Albert Einstein
- Erratum: Should Vitamin D Screening be a Part of Primary Care?

4th Fact

The Fourth of July was not declared a national holiday until 1941.
How long have you worked at KUSM-W, and what was your job before you came here?
I have worked here for 17 years this July. Prior to working here, I was a network administrator for Fourth Financial Corporation (Bank IV).

What are your job responsibilities and what do you like most about your job?
I am responsible for leading the department of IT Services. We provide computer hardware and software, telephone, audio visual and video conferencing support. We are also responsible for managing the network infrastructure of servers, storage area networks, routers, switches, database administration, and network security.

I enjoy that the job is challenging and rewarding. I believe what we do is critical to the mission of the Wichita campus. I particularly enjoy working with the great group of people in IT Services.

What are your top 5 Strengths and how do you use them in your job?
My strengths are a great match for my job.
Responsibility – I try to always do what I say I will do and have integrity.
Achiever – This drives me to keep up with the numerous demands in IT and keep striving to do better.
Focus – Many times there is more than can be done and my Focus strength helps me to isolate the critical pieces.
Restorative – Fixing things or finding a better way to do things is critical for our operations.
Arranger – This helps with prioritizing and project management.

What do you do in your spare time?
Mostly I spend time with my family. I lead a youth audio visual support team at my church. My hobbies are photography, gardening, and cooking.

What’s a favorite movie and/or book?
Most of my time reading is spent reading the Bible. “Signs” and “The Fugitive” are two of my favorite movies.

Who is your hero or the person you most admire and why?
I would have to say my husband for his integrity, his patience in teaching others, and his never-ending desire to learn new things.
Get a Leg Up on Peripheral Arterial Disease
Noon to 1:30 p.m.
Tuesday, July 17
Roberts Amphitheater

Tracie Collins, M.D., M.P.H.
Chair & Professor
Kansas Health Foundation
Distinguished Professor in Public Health

Did you miss the June 12 lecture about Immunizations with Robert Wittler, M.D.? FREE audio recordings and notes are available online at wichita.kumc.edu/livelearn within a week after each lecture.

Write Winning NIH Grant Proposals

David C. Morrison, Ph.D.
co-founder and member of Grant Writers’ Seminars and Workshops, LLC
Tuesday, Aug. 7
8 a.m. to 4:30 p.m.
Roberts Amphitheater

Breakfast and lunch will be provided.
Sponsored by the Office of the Associate Dean for Research

This is a free seminar, but each participant must have “The Grant Application Writer’s Workbook.” The workbook can be purchased the day of the seminar for $75. Note: This session will not be recorded.

Seminar registration is required by July 24 to Christina Frank, Research, cfrank@kumc.edu or 3-3811.
Wanted: Research Study Participants

The KU School of Medicine–Wichita is looking for persons with Peripheral Arterial Disease (PAD) to participate in a study examining poor leg circulation. The study will focus on those within the African-American community with low levels of activity and who experience pain and discomfort when walking. Participants will be compensated for their time and effort. For more information, call (316) 293-3567.

The KU School of Medicine–Wichita needs participants for a placebo-controlled study designed to evaluate the efficacy, safety, and tolerability of Desvenlafaxine Succinate Sustained-Release (DVS SR) in the treatment of children and adolescents ages 7-17 with Depression. Participants will be asked to complete about 10 study visits and will receive investigational study medication or placebo (inactive substance), study-related mental health assessments, lab assessments, and physical exams. Compensation may be provided for completed visits. Subjects who complete the eight-week treatment may be eligible to participate in a six-month open-label extension study. For more information, contact Jessica Rudick at (316) 293-3806.

If you are involved in a study that is recruiting subjects and would like to have it listed in Jayhawk Talk Online, please e-mail wicpa@kumc.edu with the specifics. Once we draft the copy, we’ll send it back to you for IRB approval then publish it.

4th Fact

The stars on the original American flag were in a circle so all the Colonies would appear equal.

KU Pride day for United Way

Please join us for the next KU Pride day for the United Way Campaign, Wednesday, July 18. With supervisor’s approval, you may wear jeans to work if you purchased a year pass or by purchasing a sticker for $2.50 in Human Resources. All proceeds will benefit United Way. For more information, please contact Tyler Doyle at 3-2649 or tdoyle@kumc.edu.

Match a Maple!

The AIDS Memorial Garden is in need of some help. It has moved three times since 1997 with its final resting spot located on the Wichita Campus adjacent to the parking lot on the northeast side of the complex.

The AIDS Memorial Garden was designed to remember someone special with an engraved brick. Bricks have been purchased for those who have died from AIDS or those who have been instrumental in the fight against the disease.

The hope is to beautify the area with trees, bushes, and plants to create a respite spot for anyone, including anyone who works at KUSM–W. The bricks are in place, tulips and hostas are planted, but so much more needs to be done to improve the area.

Dr. Donna Sweet has agreed to buy some Japanese maples for the area and we are asking for contributions from others to help the cause. We are looking to add several large holly bushes which cost almost $100 each. We also want to add some other plants to the area to make it much more inviting. If you are willing to contribute, contact Michael Madecky at 293-3405 or mmadecky@kumc.edu.
Reminder about how tobacco credits are awarded

For Non-tobacco users: a file of all employees who declared themselves as non-tobacco users during open enrollment was loaded to the wellness portal in November to populate the credits. Employees with established accounts should have received their 10 credits. If you did not yet have an account established, there was nowhere for your credits to go. We reload this report on a regular basis so you should see your 10 credits within three weeks after establishing your account, which can be done by clicking here.

For tobacco users: employees who declared as tobacco users during open enrollment and agreed to participate in the cessation program to receive the 2012 premium discount will need to complete the five required discussions with a Quit Coach in order to maintain their discount for all of 2012 and to earn their 10 credits toward the 2013 premium discount. Employees can expect to see their 10 credits awarded to their portal account within three weeks of completing their fifth discussion with a Quit Coach. For more information on the tobacco cessation program requirements, please click here.

Wichita Flag

Some of you already know that the Wichita flag was officially adopted on Flag Day, June 14, 1937. Thank you for your submissions. Dean Wilson held the official drawing for the retired KU flag and the lucky recipient is Jennifer Eaton, PA. Congrats!
Vehicles added to the KUSM-W motor pool

KUMC has discontinued its motor pool, so two vehicles have been transferred from their fleet to Wichita. Each of the vehicles is a white 2007 Ford Focus, one of which is pictured here. Additionally, we have purchased a 2012 Chevy Equinox which will be arriving in late June or early July.

We encourage departments to utilize our fleet for employees who will be traveling. The current mileage rate billed is $.35 (FY12), and it will increase to $.48 per mile for FY13. This is still slightly cheaper for departments compared to the mileage rate reimbursed to an employee using his or her personal vehicle at the current rates of $.51 per mile (state funds) or $.55 (KUEA funds).

Each vehicle has a calendar in GroupWise that you can proxy to search for availability. The vehicle info will also soon be updated on the Facilities Management website. To reserve a vehicle please complete a Request/reservation Form.

2012 Health Insurance Discount

Reminder that July 31, 2012, is the deadline to earn your 20 points for the $480 health insurance discount. To confirm that you have earned all of your credits follow the steps below:

1. Go to https://kansashealthquest.alerehealth.com/portal/server.pt
2. Log into the website
   a. Your username is your e-mail address
   b. If you have forgotten your password click “forgot my password” or call the HealthQuest help desk at 1 (888) 275-1205, option 9.
3. After you log in on the left hand side of the screen, under credit programs click “track credits”
4. In the middle of the screen it should say “You have earned 20 credits!” Underneath the “You have earned 20 credits” it should say “You’ve completed the incentive. Congratulations.” If you find the congratulations message, you will receive the discount.
5. If you did not receive the congratulations message, or want to verify the accuracy of the website you need to call the HealthQuest help desk at 1 (888) 275-1205, option 9.

Note: The HealthQuest portal is a State of Kansas controlled website. If you are having difficulty with the site, you will need to call the HealthQuest help desk. Neither Human Resources nor IT have access to help troubleshoot the portal. For privacy purposes HealthQuest will only release information to the employee, HR cannot call on your behalf. Sorry for any inconvenience this may cause.

4th Fact

Benjamin Franklin proposed the turkey as the national bird but was overruled by John Adams and Thomas Jefferson, who wanted the bald eagle.
New campus e-mail system coming this fall!

The next generation of e-mail is coming to your e-mail box.

Starting this fall, Microsoft Outlook/Exchange will replace GroupWise, the e-mail system used by nearly all entities on campus. Anyone using a kumc.edu address will retain their current e-mail address, and their GroupWise data will be migrated to Exchange.

The change encompasses The University of Kansas Hospital and its off-campus locations, as well as Mid-America Cardiology; the University of Kansas Medical Center and its KU Wichita Medical Practice Association; and The University of Kansas Physicians.

IT leaders at those organizations say GroupWise was falling behind in a world where integration is vital. “In our business, it’s imperative that our communication systems work together,” said Matthew Fuoco, director of Telecommunications & Networking at the medical center. “Outlook/Exchange gives us that benefit.” The market leader in business e-mail systems, Outlook/Exchange integrates easily with SharePoint websites, telephone systems (including voice mail), and with outside business partners, including systems on the Lawrence campus.

“It also offers a more reliable and better integrated mobility solution, which is important for users of smartphones and other mobile devices,” said Sean Roberts, the hospital’s systems director of Information Technology.

Many new and enhanced features will be part of this migration including instant messaging, a robust webmail client, and better integration with 3rd party applications.

The migration to Outlook/Exchange is months away, but IT leaders wanted to unveil the plan now, to keep everyone in the loop.

Also, because all e-mail and calendars will migrate over to Outlook/Exchange, the early heads-up gives you plenty of time to start cleaning out those musty folders and archives that don’t need to make the jump to Outlook/Exchange.

As the migration to the new system nears, watch for many training opportunities as well as continuous online training.

The migration to Outlook/Exchange will be a major undertaking. IT groups at the hospital, the university, and UKP will pilot the new system for several weeks, followed by a “big bang” migration weekend – currently slated for late fall.

Even after that weekend, the migration will stretch for several weeks.

In the coming weeks and months, more information will be posted here.

4th Fact

The musical “1776” premiered on Broadway in 1969 and ran for 1,217 performances. The production won three Tony awards, including one for best musical.
Tobacco Counseling Training Session

In 2010, nearly half (47%) of the infants in Sedgwick County who died during the first year of life had mothers who smoked. Research clearly establishes a causal relationship between maternal smoking and low birth weight and increased incidence of infant mortality. Helping pregnant women and new mothers stop smoking is crucial to improving the health of newborns.

A new workshop is aimed at teaching those in the medical field what to say about tobacco cessation in those tough situations during prenatal and postpartum care.

Tobacco Counseling Workshop
Friday, June 29
1 to 4 p.m.
KUSM–W
$15

Registration is limited to 35 registrants who work in outpatient obstetrics, family medicine prenatal care, and pediatric sites.

To learn more about the workshop, click here.

To register, e-mail Dr. Linda Frazier, lfrazier@kumc.edu.

Say “hello” to...

Jordan Groskurth
Supplemental Instructor
Medical Sciences

Kyle Rowe
Supplemental Instructor
Medical Sciences

Harpreet Singh
Student Assistant
PMPH
VIP discount tickets to the Warren Theatres (East, West, and Old Town) are sold in HR during regular business hours. Price per ticket is $7. Check with the theatres prior to purchase as passes are not accepted for all performances. For further information, or to check on availability of passes, contact HR at 3-2615.

Dr. Rick Kellerman, Family and Community Medicine chair, has been appointed a member of the Institute of Medicine Global Forum on Innovation in Health Professional Education.

The inaugural Head for the Cure 5K, defeating brain cancer step by step, benefits the Brain Tumor Trials Collaborative (BTTC) through the University of Texas MD Anderson Cancer Center. Register to participate, volunteer, or donate.

Saturday, June 30
8 a.m.
Sedgwick County Park
Individuals: $35 per person
Teams: $30 per person
Kids Run: $10

This funding opportunity seeks to support collaborative preliminary intervention studies to evaluate the feasibility, tolerability, acceptability, and safety of novel mechanism drug candidates, promising investigational new drugs or novel psychosocial strategies for the treatment of mental disorders and for obtaining the preliminary data needed as a prerequisite to larger-scale (efficacy or effectiveness) intervention or services studies.

More information can be found here.

The first official Fourth of July party was held at the White House in 1801.
A JayStar is a “spot award” recognition program designed to acknowledge and reward employees. To learn more about the award and how you can nominate someone, go to JAYSTARS.

Adam Borntrager
ITS

Adam Borntrager has given the staff of Rural Health Education and Services (RHES) excellent customer service over and over and over! This Jaystar is well overdue! Adam is friendly, gives timely service, and is an excellent communicator. Adam provided IT services for Kansas Career Opportunities last fall. From the sound system to the PowerPoint presentation, everything went flawlessly. The day of our event, when we decided we would like some background music, Adam ran home and got his personal collection of music to play for us. When anyone in Rural Health has a computer or printer problem, Adam is quick to take care of it. When our front desk computer blue-screened, Adam picked it up that day and was able to put together another computer for us to use that was better than the original. Adam’s nickname should be MacGyver because when our color printer was on the fritz, Adam fixed it with some scotch tape. So far, the printer is still working and we haven’t had to invest in costly repairs. After Adam completes a repair, he checks back to be sure we haven’t had any more problems. Adam gets quotes to us in a timely fashion. On one occasion, when the quote system wasn’t working, Adam let us know there was a delay and provided updates as he received them on when we could anticipate the quote. Thank you Adam for the awesome service you provide to RHES. We appreciate you!
- Laurie Scott, RHES

LaVonda Cash
PMPH

When it rains, it pours! The week of May 7-11 was the week of extreme emergency leave for PMPH Admin staff. LaVonda had requested the 11th off weeks prior. However, due to the absences, she forfeited her vacation day, came in to work (sick herself), and gave us her best! Thank you LaVonda for your consideration of others and the department.
- Dianne Fleming, PMPH

Amy Greenstein
RHES

Amy often goes above and beyond her main responsibilities in Rural Health. While I was on vacation, an urgent matter arose with one of my programs. Amy worked extremely hard to keep things running smoothly. Her hard work and dedication are greatly appreciated.
- Andrea Ellis, RHES

Leona Johnson
HR

Leona helped me considerably as we went through the process of hiring an Assistant Director for the SP Program. She helped with PD development, posting, recruitment, interviews, and hiring. We were able to recruit an excellent candidate for KUSM-W. She did all of this while taking on additional responsibilities and duties. Leona is a dedicated and hardworking employee. I am glad that I get to work with her.
- Steve Charles, Medical Sciences
Kurt Konda has put his figurative running shoes on, and it is impossible for him to take them off! Kurt has led a couple of very complex projects recently, one with the Kansas Health Institute and Pew Charitable Trust regarding a health impact assessment for a projected casino in southeast Kansas. This has been an extremely time-intensive project that has also been hampered by the finickiness and funkiness of the Kansas legislature! Kurt has also lead several projects with Judy Johnston and the United Methodist Health Ministry Foundation. Kim Moore, the director of the foundation, told Judy Johnston that Kurt was such a joy to work with! He mentioned that Kurt is always pleasant, he presents information thoroughly, and always returns back to the drawing board willingly when additional questions arise. It is such a joy to see Kurt lead these projects so beautifully. I love seeing Kurt be such a (Jay) Star!

- Dr. Elizabeth Ablah, PMPH

Kris is a dedicated and hardworking individual. During all of the transition in the Standardized Patient Program, Kris has stepped up to the plate. She has taken on a leadership role and kept the SP Program running smoothly. She has worked extra hours, including nights and weekends, to prepare the center for the medical students. Kris is dedicated, organized, and efficient. She also has the ability to problem solve as technical issues arise. She is a great team member and I am thankful for her.

- Steve Charles, Medical Sciences

She has gone above and beyond in assisting with the transition from contract workers for Standardized Patients to part-time employees. She has made sure that all documents, processes, and paperwork were completed and that all SPs received their paychecks on time. Jera's commitment and hard work allowed for the third-year students to have SPs for their June CSA.

- Steve Charles, Medical Sciences

4th Fact

Presidents John Adams, Thomas Jefferson, and James Monroe all died on the Fourth. Adams and Jefferson died on the same day within hours of each other in 1826.
Jamie Ball  
**Hometown:** Eureka, Kan.  
**Family:** Debbie (mother), Keith (father), Kelsie (sister)  

When and how did you first get interested in medicine?  
I first became interested in medicine when I had a severe athletic injury where the doctors believed I would never walk again. It was the doctors and physical therapists who never gave up on me and tirelessly researched therapies and procedures to help me walk again that made me desire a career in medicine.

What field of medicine are you leaning toward?  
I am eyes wide open at this point in my medical education. I have always been interested in pediatrics and surgery, but I am still open to anything!

Whom do you most admire, or who is your hero, and why?  
The person I admire the most is my grandfather, Jack Downing. He is one of the hardest working individuals that I know and lives his life according to his faith, compassion, and honesty. He is a genuinely selfless man who always goes above and beyond to help others and would do anything for those around him without ever expecting anything in return. He has taught me countless life lessons and has provided me with an individual to model my life after.

What is one interesting fact or unusual trait about you?  
One interesting fact about me is that I am a four-state NFL Punt, Pass, and Kick champion.

Andy Patton  
**Hometown:** Prairie Village, Kan.  
**Family:** Bailey Roberts (fiancée), Leon Patton (dad), Connie Patton (mom), Emily and Natalie Patton (sisters)  

When and how did you first get interested in medicine?  
"Mountains Beyond Mountains" the summer before my first year of college.

What field of medicine are you leaning toward?  
Family Medicine - Internationally.

Whom do you most admire, or who is your hero, and why?  
My hero is Jesus Christ, for reconciling me to God through his death on the cross.

What is one interesting fact or unusual trait about you?  
I want to be a medical missionary, and serve people in a really poor part of the world.

---

**4th Fact**  
The Declaration of Independence was signed by 56 men from 13 colonies.
National Library of Medicine Traveling Exhibit on Display in Farha Library

“The Henkel Physicians: A Family’s Life in Letters” features the National Library of Medicine's collection of the family correspondence of a remarkable family of doctors in 19th century Virginia. The letters document the working lives of the Henkel physicians as they share medical cases, professional rivalries, and the experience of the Civil War. Visit the exhibit website for additional details.

The exhibit is on display in the Farha Medical Library now through July 28. You may also view the full Henkel letter archive online.

Summary and images courtesy of the National Library of Medicine, National Institute of Health.

4th Fact

The 1996 blockbuster film “Independence Day” starring Will Smith and Bill Pullman was originally slated to be released on Memorial Day with the title “Doomsday” to avoid 4th of July movie competition.
