October is National Breast Cancer Awareness Month. This cause is special to many, as just about everyone knows someone affected by breast cancer in some way. Here at KUSM–W, we hold the cause dear as well. The **KU Center for Breast Cancer Survivorship (CBCS)** is currently utilizing Komen grant money to provide consultations with our dietician and a time-limited gym membership for breast cancer survivors, including “LIVESTRONG at the Y” which is a supervised exercise program for cancer survivors. The Survivorship team is able to provide an individualized assessment for the potential short- and long-term side effects of treatment and recommendations for care, and works collaboratively with the survivor and their health care teams to share this information.

Community involvement is at the heart of any cause, and this one is no exception. At the recent Komen Race for the Cure, for the second year in a row, KU partnered with the Plastic Surgery Center to form “Team KUPS,” with more than 20 registered including staff from both agencies and survivors. Other community involvement includes supporting and hosting public educational sessions.

“Living with Metastatic Breast Cancer” is a two-part series from 12:30-1:30 p.m., Oct. 11 and Oct. 25. The first session addresses “Progress in the Treatment of Metastatic Breast Cancer” and the second focuses on “Managing the Challenging Side Effects of Metastatic Breast Cancer Treatments.” This free workshop is for people living with metastatic breast cancer, their families, friends, and health care professionals. Listen to this workshop via telephone or connect to the webcast online. Register online or call CancerCare at 1 (800) 813-4673.

The CBCS holds free monthly educational programs, the next one being “Breast Cancer-Living Your Best Life” on Wednesday, Oct. 24. In addition, Angie Carr, L.S.C.S.W., A.C.S.W., M.B.A., CBCS patient navigator, will speak about survivorship at the **Garden of Life Breast Cancer Awareness** event presented by Sister to Sister on Saturday, Oct. 27.

To help show consolidated support for breast cancer awareness and CBCS this month, we ask that you join us in wearing pink every Friday in October. Let the power of pink shine through on the Wichita campus!

All breast cancer facts stated within (unless noted) are from the American Cancer Society’s Breast Cancer Facts & Figures report for 2011-2012.
KU Pride
The next KU Pride will take place at 9 a.m., Wednesday, Nov. 7, in the Sunflower Room. Don’t miss it!

Save the Date
The 21st Annual Research Forum is scheduled for Thursday, April 18, 2013 at the KU School of Medicine–Wichita. Mark your calendars, and watch for details in the coming months.

Questions can be directed to Christina Frank, cfrank@kumc.edu, in the Office of Research.

E-Learning Modules available to employees

KUMC has several e-learning modules for employees. Topics include:

- Career Advancement: Success for the Promotion Seeker
- Management/Leadership: Hiring Competent Employees, What Every Supervisor Should Know, and Writing Effective Position Descriptions
- Policies & Procedures: Corrective Action, Family & Medical Leave Act, FLSA, Overtime/Compensatory Time, Shared Leave, and Workplace Violence
- Professional Development: Managing Your Time, Preventing Harassment in the Workplace, and Conflict Management.

To complete these trainings, click here. You will need to use your network username and password to log in.

Kansas Career Opportunities

Medical students and resident physicians, join us for Kansas Career Opportunities (KCO)! Representatives from more than 30 health care organizations attend KCO in hopes of recruiting the most talented health care professionals in Kansas.

Don’t miss your opportunity to visit one-on-one with health care employers from across Kansas.

Thursday, Oct. 4
Kansas Physician Panel: 2:30 p.m.
Visit Exhibitors: 4–7:30 p.m.
Complimentary appetizers and wine
Wichita Boathouse (next to Gander Mountain)
515 S. Wichita

This career fair is sponsored by Rural Health Education and Services, University of Kansas Medical Center.
Please register online for this free event or call (316) 293-2649.

BC Fact
Obese breast cancer patients have about a 30% higher risk of death compared to those who maintain a healthy weight.
KUSM-W in the News

- Sept. 21—KU Med physician selected to lead internal medicine society
- Sept. 20—Dr. Russell Scheffer interviewed on “Impact”
- Sept. 19—Report: Kansas projected to be among most obese states by 2030

For the latest news about KUSM–W, click here.

Plant It Pink

Honor a breast cancer survivor, beautify your garden, and raise money for a good cause when you Plant It Pink. For a $20 donation, you’ll receive ten Darwin Hybrid Pink Impression tulip bulbs that you can plant in the fall and enjoy next spring.

Each year, more than 1,890 Kansas women are diagnosed with breast cancer. The good news is that more women are surviving breast cancer than ever before because of better screening and improved treatment.

The American Cancer Society Cancer Action Network (ACS CAN) is a leader in the fight against breast cancer. We help protect the National Cancer Institute’s $5 billion budget that funds the research that leads to breakthrough treatments. ACS CAN also works to make sure that every woman gets the mammogram she needs by advocating for the National Breast and Cervical Cancer Early Detection Program.

When you Plant It Pink, you also receive a one-year membership to ACS CAN.

Tulips are a symbol of renewal and a metaphor for the cancer experience. Your blooming pink tulips will honor the women in your life who have or are currently battling breast cancer and will serve as a reminder to get your annual mammogram.

Visit Plant It Pink of Kansas to order your bulbs or for more information.

Getting Started with IMB SPSS Stats 20

Noon to 1 p.m.
Tuesday, Oct. 23
Santa Fe Room
Rosey Zackula

Light refreshments will be provided. This lecture will also broadcast live via Adobe Connect.

Rosey Zackula is a statistical consulting coordinator/applied statistician for the Office of Research at the KU School of Medicine–Wichita. She provides statistical consulting to investigators, faculty, residents, medical students, and other research teams. She has a master’s degree in statistics from the University of Missouri-Columbia and a bachelor’s degree in psychology from Kansas State University. Her research interests include working with large data sets, designing electronic health records for research and quality improvement projects, and establishing biomarkers for mental disorders.

Congratulations!

Ryan LaSota, M.D., and Anna LaSota, D.O., Via Christi residents, are the parents of Leah Katherine LaSota, born Sept. 27. Ryan is also a KUSM–W grad.
How long have you worked at KUSM–W, and what was your job before you came here?

Just a little over a year. Before I worked at KUSM–W, I worked at Kansas State University doing computer technical support repairing laptops and desktops for students and faculty.

What are your job responsibilities and what do you like most about your job?

Supporting the faculty, staff, and students and ensuring they can be successful using the available technologies. Whether it’s a problem with a smart phone, a computer, or a piece of software, I help them through it all. What I most like about my job is working with people. It seems like anyone I talk with is like family. We are all willing to help each other out. The relationships I build with people are important to me.

If you have taken the Strengths Finder Assessment, what are your top 5 Strengths and how do you use them in your job?

Analytical, Achiever, Communication, Adaptability, and Relator. Analytical is on the top of the list because of how I think things through when it comes to anything. Making a decision, I have to know each option and choose the best one. When it comes to finding a solution to a problem that deals with technology, I think it through carefully. That also applies to everyday life situations. Achiever is second and applies to how I want to follow through with things. I don’t like spending too much time talking about doing something, but rather I want to jump into it immediately and figure it out. Communication is a big one, as I can form my thoughts and explain them thoroughly to someone so they can understand what I am doing. Adaptability is my laid back approach of going with the flow. I am open to better and more efficient ways of doing things. Finally, Relator is where I enjoy having close relationships with others. I enjoy working hard with others who share the same goal. I am very straightforward to people and show them that I am honest, loyal, and reliable.

What do you do in your spare time?

I enjoy spending time with my friends, catching up on several TV shows I’m currently hooked to, and watching my favorite sports teams live or on TV.

What’s a favorite movie and/or book?

Pretty tough to choose just one, but I suppose it would be “Fight Club.” Also, the top movies that I can generally watch over and over would be “Seven,” “Office Space,” and “The Matrix.”

Who is your hero or the person you most admire and why?

My father would be my primary hero in my life. He’s shown me that hard work pays off. Everything he has worked for, he has earned for himself and our family. He started out with nothing and has worked hard for the things he wants in life. He is not selfish and will always put others before himself.
Putting Out the Fire: Prevention & Treatment of Acid Reflux & Ulcers
Noon to 1:30 p.m.
Tuesday, Oct. 9
Roberts Amphitheater

William Salyers, Jr., M.D., M.P.H.
Medical director
KU Wichita Gastroenterology

Did you miss the Sept. 11 lecture about cholesterol with Dr. Maurice Duggins?
FREE audio recordings and notes are available online at wichita.kumc.edu/live-and-learn within a week after each lecture.

Psychiatry Grand Rounds

Tuesday, Oct. 9
“Mental Illness in Pregnant and Nursing Women”
Zachary Stowe, M.D.

Tuesday, Oct. 23
“HIV/AIDS and Depression”
Zishan Samiuddin, M.D.

11 a.m. lunch served
11:30 a.m. to 1 p.m. speaker
Via Christi Hospital, 3600 E. Harry
McNamara Center (third floor Education Center)

BC Fact
In 2011, an estimated 230,480 new cases of invasive breast cancer will be diagnosed among women, as well as an estimated 57,650 additional cases of in situ (non-invasive) breast cancer.

JTO receives birthdays from Academic and Student Affairs, MPA, WCGME, the MPH program, and Human Resources. If you prefer that your birthday not be published, please notify the appropriate representative.
Wanted: Research Study Participants

The KU School of Medicine–Wichita is looking for persons with **Peripheral Arterial Disease (PAD)** to participate in a study examining poor leg circulation. The study will focus on those within the African-American community with low levels of activity and who experience pain and discomfort when walking. Participants will be compensated for their time and effort. For more information, call (316) 293-3567.

The KU School of Medicine–Wichita needs participants for a placebo-controlled study designed to evaluate the efficacy, safety, and tolerability of Desvenlafaxine Succinate Sustained-Release (DVS SR) in the treatment of **children and adolescents ages 7-17 with Depression**. Participants will be asked to complete about 10 study visits and will receive investigational study medication or placebo (inactive substance), study-related mental health assessments, lab assessments, and physical exams. Compensation may be provided for completed visits. Subjects who complete the eight-week treatment may be eligible to participate in a six-month open-label extension study. For more information, contact Jessica Rudick at (316) 293-3806.

If you are involved in a study that is recruiting subjects and would like to have it listed in Jayhawk Talk Online, please e-mail wicpa@kumc.edu with the specifics. Once we draft the copy, we’ll send it back to you for IRB approval then publish it.

KU Pride day for United Way

Please join us for the next KU Pride day for the United Way Campaign, Wednesday, Oct. 17. With supervisor’s approval, you may wear jeans to work if you purchased a year pass or by purchasing a sticker for $2.50 in Human Resources. All proceeds will benefit United Way. For more information, please contact Tyler Doyle at 3-2649 or tdoyle@kumc.edu.

A **JayStar** is a “spot award” recognition program designed to acknowledge and reward employees. To learn more about the award and how you can nominate someone, go to **JAYSTARS**.

**Ruth Friesen**
Medical Sciences

Ruth has really stepped up during a time when help was needed by Medical Sciences. With short timelines and arrival of the first-year students, Ruth took on additional projects and supported the implementation of a new JayDocs curriculum management software program. Ruth even supported ASA when they were not fully staffed by organizing catering for many events during the first-year orientation. It feels good to know that I can depend on Ruth.

- **Steve Charles, Director of Medical Education**

**BC Fact**

Rocker Sheryl Crow says she is “a walking advertisement for early detection,” after catching suspicious calcifications in both of her breasts on a routine mammogram. She was able to skip chemotherapy because her cancer was caught so early. In March 2007, Crow (who has no close family history of breast cancer) petitioned Congress to fund research into possible links between breast cancer and environmental factors. **Source: Health.com**
Introduction to Clinical Research

5 to 6:30 p.m.
Thursdays
Via ITV from the Kansas City campus

This course will provide a basic and broad overview to clinical research. Attendees will gain an understanding of how to develop clinical research questions, including protocol design and the factors that should be considered when initiating a clinical research study. This may be of great interest to residents who are contemplating fellowships. By the end of the course, students will have completed a Research Outline in preparation to begin a research project.

For a complete course description, click here.

The course is open to all at KUMC, including faculty, staff, students (medical and MPH), and residents.

Click here for a registration form. Residents, fellows, and faculty should use this form to register. Students enrolling for credit should enroll through the registrar’s office.

The course is also open to all KUMC staff and faculty. The course will be offered at no charge and, as this is a non-credit course, there is no need for faculty and staff to enroll through the registrar’s office.

Registration forms must be e-mailed to Donita Dalton, ddalton@kumc.edu, and Trisha Richmeier, trichmeier@kumc.edu.

Contact the Office of Research, 3-3811, with questions.

BC Fact
Breast cancer survivor and “Sex and the City” actress Cynthia Nixon, whose mother also survived breast cancer, decided to make her story public when she realized it might serve as an inspiration for other women at risk. She now serves as an ambassador for Susan G. Komen for the Cure.

### Roll out the Outlook!

Outlook rollout is scheduled for Monday, Nov. 5. At 5 p.m. Friday, Nov. 2, IT staff will begin the migration process of moving GroupWise items into Outlook. During this time (from 5 p.m. Nov. 2 to Nov. 4) you will have access to new e-mail with Outlook’s Web Application (OWA). The link to OWA will be provided prior to the migration. Old e-mails will be available during this time through GroupWise webmail but we are asking that you only use it if absolutely necessary and only to view items. The reason for this is that any changes made in GroupWise webmail during that time period will not be reflected in Outlook.

You will need to document the following things in your GroupWise account before the migration so that you can set them up in Outlook after the migration:
- Proxy rights
- Rules
- Shared folders
- Shared address books

If you manage a resource, for example a meeting room, you will also need to document these settings for that resource.

Please be sure you register for the Brainstorm QuickHelp online training.

This document will help with GroupWise cleanup.

If you are unable to attend an overview session, watch a recording of one of the sessions or review the PowerPoint slide show.

If you need assistance with any of these resources please contact the Help Desk at itswichita@kumc.edu, or 293-2605, option 1.

### What’s Cookin’ With Diabetes

If you have diabetes and want to learn more about managing your condition and cooking healthy, you and one guest are invited to “What’s Cookin’ with Diabetes,” a free seminar offered by Blue Cross and Blue Shield of Kansas and K-State Research and Extension. “What’s Cookin’ with Diabetes” will provide self-management guidelines that will help you understand the importance of taking medications, eating healthy, and being active. The proper combination of all these items is essential to living better with diabetes. In addition, you’ll learn or be refreshed on how and why to monitor your blood sugars, problem solving, and ways to reduce your risks.

Attendees will be offered small samples of diabetes-friendly foods. There will also be take-home materials, tasty recipes, and community resources. Pre-registration is required and seating is limited. **Sign up** early to reserve your spot. The following seminars are open to the public: Dodge City, Oct. 22 (English & Spanish Sessions); Liberal, Oct. 23 (English & Spanish Sessions); Pittsburg, Oct. 29; Paola, Oct. 30.

### BC Fact

Excluding cancers of the skin, breast cancer is the most common cancer among women, accounting for nearly 1 in 3 cancers diagnosed in U.S. women.
Breast Cancer: Living Your Best Life
Learn how to reduce or overcome limiting factors, including lymphedema, fatigue, posture, movement and strength of the involved arm(s). Presented by Shelli Hill, D.P.T., and Susan Palmer, P.T., of Palmer Physical Therapy for Women
6-7 p.m.
Wednesday, October 24
Cypress Medical, 9300 N. 29th St., Ste. 209
Pre-registration requested to (316) 293-2655. More information can be obtained from this flier.

Congratulations!
Nicole Klaus, Ph.D.
Psychiatry & Behavioral Sciences assistant professor
$30,000
"Engaging and Educating Latino Families of Children with Mood Disorders"

Dr. Klaus’ study plans to build community partnerships to engage Latino communities in research and pilot the Spanish Psychoeducational Psychotherapy intervention. This pilot study will lay the groundwork for further evaluation of the Spanish PEP intervention in a larger randomized trial to establish efficacy.

Professional Development
"Give Without Regrets: Having Holiday Spirit Without Breaking the Bank"
Excited about the holidays? Me, too! This is the time of year that beckons to us to give and spend “cheerfully.” Join us as we explore ways to keep spending under control. Together we will raise our awareness of money traps and create a plan to keep the “cheer” in the holidays as we map out ways to experience true financial health. Instructor will be JoLynn Bright from EMPAC.

Two Dates to Choose From:
10 to 11 a.m., Oct. 23, 2012
3 to 4 p.m., Oct. 31, 2012
Meadowlark Room
Sign up today!

BC Fact
American Cancer Society Guidelines for the Early Detection of Breast Cancer in Average-risk, Asymptomatic Women

Age 20-39
- Clinical breast exam at least every three years
- Breast self-examination (optional)

Age 40 and over
- Annual mammogram
- Annual clinical breast exam (preferably prior to mammogram)
- Breast self-examination (optional)
**Don’t forget your discounted movie tickets**

VIP discount tickets to the Warren Theatres (East, West, and Old Town) are sold in HR during regular business hours. Price per ticket is $7. Check with the theatres prior to purchase as passes are not accepted for all performances. For further information, or to check on availability of passes, contact HR at 3-2615.

---

**Research funds available**

Collaborative R34s for Pilot Studies of Innovative Treatments in Mental Disorders (Collaborative R34)
National Institutes of Health
Award amount $225,000
Closing date for applications January 7, 2015

This funding opportunity seeks to support collaborative preliminary intervention studies to evaluate the feasibility, tolerability, acceptability, and safety of novel mechanism drug candidates, promising investigational new drugs or novel psychosocial strategies for the treatment of mental disorders and for obtaining the preliminary data needed as a prerequisite to larger-scale (efficacy or effectiveness) intervention or services studies.

More information can be found here.

**Rural Photography Contest Winners**

Rural Health Education and Services is proud to announce the winners of the 2012 Rural Kansas Photography Contest. This year marked the largest contest to date with 87 participants entering 383 photographs. View the winning photos on the Rural Health website. Winning photos will also be published in the January edition of Kansas Connections.

2013 Contest
The dates for the 2013 Rural Kansas Photography Contest will be Sept. 2 to Nov. 4, 2013. Final judging of the contest will be incorporated with the 2013 National Rural Health Day. The categories for 2013 are:

- Community Landmarks
- Four Seasons
- Health Care
- Heartland Adventures
- Wildlife and Critters

Find out more information on the 2013 contest!

---

**Classifieds**

If you have an item to buy, sell, or trade, consider listing it as a FREE classified ad in JTO. This service is available to students, residents, faculty, staff, and others who work for KU, MPA, and affiliates.

Remember, you must resubmit – by e-mailing wicpa@kumc.edu or calling 293-2643 – to list an item again!
