Want to Locate a Pharmacy?

1. Go to www.medtrakrx.com
2. Login with your username and password
3. Click on 'Find a Pharmacy'
4. Search by City or State
5. Choose one of these pharmacies and your prescriptions will be covered according to your benefit plan

FAQs

What copay will I pay for my medication?

Generic CoPay: The amount you are required to pay for generic medications, which are low cost medications.

Formulary CoPay: The amount you are required to pay for formulary medications, which are high cost generics and low cost brand medications.

Non-Formulary CoPay: The amount you are required to pay for non-formulary medications, which are expensive brand medications that may have lower cost alternative(s).

Select Formulary

Please refer to the copay structure table within this booklet. You will pay either the Generic copay or the Brand copay for drugs on the formulary. To determine if your medication is covered, please refer to the **MedTrakRx Select Formulary**, which can be found by logging on to www.medtrakrx.com and clicking on *My Plan Information* → *Forms and Downloads*. Please ask your doctor to prescribe a Generic or Formulary drug whenever possible.

Insert if they do not utilize RightChoice Programs (no ScriptChoice)

How can I find out more about cost savings?

Go to medtrakrx.com. Click on Rx Price Finder to find the cost of specific drugs and lower cost alternatives. Please discuss this information with your doctor. Switching to the preferred alternative will save you and your employer money.

Can I obtain a 90-day supply of my NEWLY prescribed medication?

Your prescription drug plan includes a “Starter Dose” program. Prior to getting a 90-day supply of any new medication at a Performance 90 pharmacy, you must start with a 30-day supply at a participating retail pharmacy. This reduces waste in cases where your doctor tells you to stop taking the new medication early due to efficacy or side effects.

What is Step Therapy?

Step Therapy is a program designed for members to start with the most cost-effective and safest medication before progressing to more costly or risky therapies. With Step Therapy, members are required to take a Step One medication before trying a Step Two medication. For more information, call 800-771-4648 and speak to a pharmacy benefit advisor.

How do I know if my drug has a generic equivalent?

Your plan encourages the use of generic drugs because they are as effective as brands, but much less expensive. Please ask your physician and your pharmacist to prescribe and dispense generic drugs whenever possible.

FAQs

Will I pay more if I choose to fill a Brand when a Generic is available?

Yes. If your brand drug has a generic equivalent, you will pay higher copay in addition to the difference in cost between the brand and generic prescription.

What is the difference between a brand and a generic?

Cost. The FDA requires that a generic drug have the same quality and performance as its brand counterpart. Generics are less expensive because they are not required to repeat costly clinical trials the brand drug completed, along with lower advertising, marketing and promotion costs. To find out if your drug offers a lower cost alternative, go to medtrakrx.com and price a medication under Rx Price Finder.

What if I have more questions?

We want to help you! We highly encourage you to call a MedTrakRx Pharmacy Benefit Advisor at 800-771-4648 or visit our website at medtrakrx.com. In addition, if you encounter any issues when visiting your local pharmacy, please ask the pharmacist to call us so we can assist them right away!

Register for your chance to win \$100!
