

RESIDENT E-MAIL ACCOUNTS – (WCGME)

All WCGME residents will be issued email accounts at the beginning of their residency. If a WCGME resident was a KU medical school graduate this same account will remain with them throughout residency. Email is an official communication mechanism used by the WCGME organization to relay information to the residents; therefore residents must regularly check email to assure they are receiving all communications. They are expected to follow all University policies outlined below to ensure that email is responsibly used and managed.
